LCD PANELS & DIGITAL SIGNAGE

Automatically initiate or interrupt visual messages and programming with emergency warnings and instructions, branding videos, presentations and daily announcements.

PRODUCT OVERVIEW

- Visually communicate with all recipients at once.
- Automatically interrupt regular programming with pre-recorded visual instructions for any emergency.
- Integrates with other forms of mass notification.

PRODUCT FEATURES

- Control all media from your desktop or mobile app.
- Pre-record media for everyday use or situation-specific emergencies.
- Interrupt regular programming to launch emergency alerts and instructions.
- Turn LCDs on and off and select the correct source input.
- Preschedule advertising, presentations, announcements and branding videos.
- Integrates with fire alarm, door and card access and shooter detection systems to provide immediate alerts and instructions.

PRODUCT BENEFITS

- Effective in noisy environments.
- Attracts attention and appeals to visual learners.
- Emergency information reaches everyone and is clearer when alarms and instructions are automatically communicated via multiple forms of communication (e.g. visual signs, intercom, PC pop-ups, etc.).
- Regular, non-emergency communication can be pre-scheduled for lobbies, waiting rooms, public venues and classrooms.
- Automated emergency communication and mass notification eliminates searching, confusion and panic and can save lives.
- Powerpoints, videos, web pages and more supported.

Technical Specifications

REQUIREMENTS

Requires the use of a Media Controller. The Media Controller stores videos to play instantly, no need to stream videos over the network. Media Controllers support PowerPoint, WEB pages, cameras, videos and more.

Software

- Digital Signage Module
- Tier 3 License per Panel/Sign
- Optional: Text to Speech Engine and Tier 3 License per port for Audio PA over LCD panel

Equipment

- Server Platform - one of the following components:
 - ▶ Small Intel Server: Model-NUC Small Form Factor (LSI-H10200)
 - ▶ Dell Server: Dual Power, Hardware RAID (LSI-H10302)*
 - ▶ Virtual Server: Requires client to provide virtual environment and network/tech support
 - ▶ Customer Provided Server: Minimum server requirements*
- Media Controller per individual device (LSI-H65205)

Network

Server

- 1 static IP, subnet, gateway, DNS, per device
 - ▶ 3 static IPs, subnet, gateway, DNS, per device if using a redundant configuration
- Standard power (110V or 220V) per server
- Ethernet network connection required for each server
- UPS recommended
- It is the responsibility of the customer to appropriately configure their network equipment so that the server pair appears to be residing on the same network and subnet.
- *NOTE: Serial and parallel ports have been disabled on the LSI server*

Media Controller (LSI-H65205)**

- DHCP device - If DHCP server is not available, required 1 static IP, subnet, gateway, DNS, per device
- Standard power (2 outlets) for LCD and Media Controller are required at the installation site
- Ethernet network connection
- Media Controller must be mounted behind the wall-mounted LCD using provided mounting bracket
- Media Controller can also sit on a desk top or other flat surface if used with a stand-mounted LCD
- Media Controller warranty will be void if proper clearance is not provided for ventilation
- HDMI cable and an RS232 cable to connect LCD to Media Controller (supplied)
- *NOTE: To utilize the "Speak Live" functionality over these devices, a phone interface is required. See PBX Interface requirement options.*

*optional redundant configuration **media controller not required for 3rd party digital signage CMS integrations
