SECURITY CAMERA INTEGRATION

Automatically push event- and motion-activated, live camera views to administration, security and first responders.

PRODUCT OVERVIEW

- Cameras are activated by pre-determined events or motion.
- Live views are pushed to desktop, tablet and/or LCD screens.
- Graphically select cameras/views from a browser screen.

PRODUCT BENEFITS

- Live camera views automatically pop up on administrator and security personnel's screens.
- First responders can access live camera views and a graphical location map en route to your emergency.
- Easily select live camera views across campuses and remote locations from one browser screen.
- A visual record of activity.

PRODUCT FEATURES

- Motion-activated and event-activated options.
- Select onsite or remote cameras from a centralized graphic display.
- Automatically record and store video.
- MJPEG or MP4 stream supported.
- Integrate with fire panel, door and card access, public address, contact closures, wired or wireless buttons and more.

Technical Specifications

REQUIREMENTS

Integration to existing cameras requires a MJPEG or MP4 format. The interface will provide the ability to pop up or push the camera view in front of people based on live events.

Software

- Video Camera Integration Module
- Tier 2 License per Camera device

Equipment

- Server Platform - one of the following components:
 - ▶ Small Intel Server: Model-NUC Small Form Factor (LSI-H10200)
 - ▶ Dell Server: Dual Power, Hardware RAID (LSI-H10302)*
 - ▶ Virtual Server: Requires client to provide virtual environment and network/tech support
 - ▶ Customer Provided Server: Minimum server requirements*

Network

Server

- 1 static IP, subnet, gateway, DNS, per device
 - ▶ 3 static IPs, subnet, gateway, DNS, per device if using a redundant configuration
- Standard power (110V or 220V) per server
- Ethernet network connection required for each server
- UPS recommended
- It is the responsibility of the customer to appropriately configure their network equipment so that the server pair appears to be residing on the same network and subnet.
- *NOTE: Serial and parallel ports have been disabled on the LSI server*

* optional redundant configuration
