# MISSING CHILD & PERSON ALERT

*Speed the recovery of a missing child or person with instant mass alerts.*

## PRODUCT FEATURES

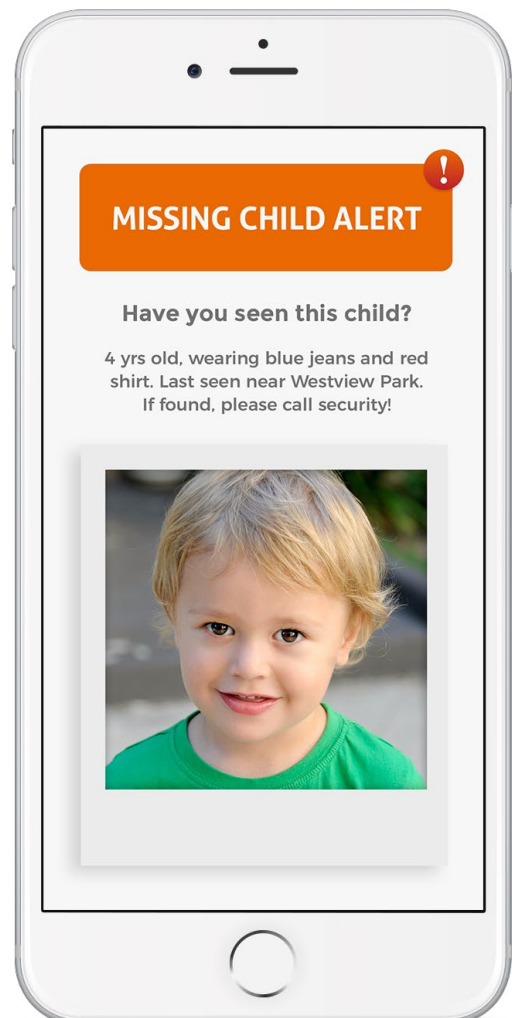

- Instant dissemination of missing child or person's photo and instructions to the security team and other select audiences via mobile, PC alerts and digital signage.
- Photo can be obtained from a mobile phone, card access system with pre-loaded photos of children and individuals, or other means.

## PRODUCT BENEFITS

- Respond faster when children get separated from their guardians in large, public or crowded spaces like amusement parks, school campuses, events and more.
- Reduce delays and manual steps when every second counts for an individual's safe recovery.

## HOW IT WORKS - 3 EASY STEPS

1. Obtain a recent digital photo of the missing child or person.
2. On a computer running the Layered Solutions PC Alert, place the photo file in the designated desktop folder.
3. Photo immediately goes out to select user groups on all mobile app endpoints. Photo can also be emailed, displayed on connected PCs and digital signage.

# Technical Specifications

## REQUIREMENTS

Layered Solutions Mobile App installed in security team's smartphones.  
Layered Solutions PC Alert installed on a primary security PC, and designated desktop folder for pictures is set up. Connected technologies (e.g. other PCs, digital signage, PA system, phones and more) can be easily integrated with Layered Solutions software for multi-layered mass notifications.

### Software

- Mobile Application Module
- PC Alert Module
- Tier 1 License per end device

### Equipment

Server Platform - one of the following components:

- Small Intel Server: Model-NUC Small Form Factor (LSI-H10200)
- Dell Server: Dual Power, Hardware RAID (LSI-H10302)  
– optional redundant configuration
- Virtual Server: Requires client to provide virtual environment and network/tech support
- Customer Provided Server: Minimum server requirements  
– optional redundant configuration

### Network

Server

- 1 static IP, subnet, gateway, DNS, per device
  - ▶ 3 static IPs, subnet, gateway, DNS, per device if using a redundant configuration
- Standard power (110V or 220V) per server
- Ethernet network connection required for each server
- UPS recommended
- It is the responsibility of the customer to appropriately configure their network equipment so that the server pair appears to be residing on the same network and subnet.
- *NOTE: Serial and parallel ports have been disabled on the LSI server*

### Installation of PC Alerts on PC/Macs

- Installation of a client on each PC/Mac to receive PC Alerts
- Operates on ports 6510 and 6520
- Not multicast and not broadcast
