

PREVENT INFECTIONS, CLOSINGS WITH AUTOMATED SELF HEALTH SURVEYS

Automate pass/fail surveys to screen employees for COVID-19 symptoms and compliance with safety procedures. Or, adapt surveys to drive other desired behaviors with just a few clicks.

STEP 1

Open the LSI Mobile App

STEP 2

Press "Take the Survey"

STEP 3

Answer the prompted questions

STEP 4

Report sent to admin/mgr

PRODUCT OVERVIEW

Keep the people under your care safe, prevent business losses and closures by automating COVID-19 screenings via mobile app, SMS texting, or email. You can also adapt surveys to drive other desired behaviors as your goals and conditions change.

PRODUCT BENEFITS

- Increase employee awareness and compliance with health and safety procedures.
- Add another layer of safety and disease prevention, in seconds.
- Reduce manual labor while increasing safety monitoring.
- Help prevent business closings and losses due to contamination.

PRODUCT FEATURES

- Initiate or automate a daily pass/fail survey from the LSI web interface.
- Recipients are automatically prompted to respond via the LSI mobile app, text messaging, or email.
- Auto-generated reports are sent to select personnel, displaying which recipients passed (colored in green), which failed (red), and which have not completed the survey after a set period has passed.
- Survey results are exportable and archivable.

ABOUT LAYERED SOLUTIONS

Layered Solutions helps organizations reach more people faster, easier and affordably with integrated routine and emergency communications.

- Multiply instant notification capabilities.
- Resolve emergencies faster.
- Improve operations, productivity and engagement.
- Integrate with technologies you already have.
- Manage all integrated technologies from a single dashboard.
